

## Online multimedia database system (MeTube)

This project involves developing an online multimedia database system called MeTube that essentially includes the functionalities of YouTube system.

Some of the functionalities implemented in the MeTube System are the following:

- Sign-up/Sign-in/Sign-out
- Profile Update
- Upload Media files
- Download videos
- Search for media
- Browse media by categories
- Playlists creation and display
- Channel subscription
- Creating and viewing Forums
- Posting messages on Forums

Languages used: PHP, SQL, HTML, CSS, JavaScript

**Note:** MeTube is designed for experimental purpose only as part of the graduate program curriculum.
